

QGIS Application - Feature request #4657

Allow selecting nodes the same way is possible to select geometries

2011-12-17 04:18 AM - Giovanni Manghi

| Status: | Closed | |
| Priority: | Normal | |
| Assignee: | | |
| Category: | Digitising | |
| Pull Request or Patch supplied: | | Resolution: invalid |
| Easy fix?: | No | Copied to github as #: 14554 |
| Description | | |
| Example: by rectangle, by circle, by freehand | | |
| use case: sometimes it is necessary to select multiple (adjacent) nodes to move/delete them. | | |
| If the nodes are many/very dense then selecting them by using the CTRL key turns to be a very difficult operation. | | |

History

#1 - 2011-12-17 04:20 AM - Nathan Woodrow

You are already able to select a group of nodes by dragging a rectangle using the Node Tool

#2 - 2011-12-17 04:25 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

right, sorry for the noise
