

QGIS Redmine (QGIS bug tracker) - Feature request #4677

Add "QGIS Version" field

2011-12-19 08:44 AM - Alexander Bruy

Status:	Open	
Priority:	Normal	
Assignee:		
Category:		
Pull Request or Patch supplied:		
Description		
<p>There is a "Target Version" field in ticket metadata which interpreted as "Milestone". But there is no field where reporter can set used QGIS version. This makes tracking bugs a bit complex because developers don't know in which QGIS version this bug present.</p> <p>Ideally this field should be mandatory and allow multiple values, because several version can be affected by bug.</p>

There's an affected version field now - but without multiple selection.
