Not confirmed here on both Windows and Linux (Ubuntu). Can you try a recent qgis-master version and report back? thanks.

#2 - 2012-01-02 03:47 AM - Arunmozhi P

I was using the code merged from the upstream master, when I noticed this. Anyway I will pull and merge again to see if it still occurs.

#3 - 2012-01-14 03:06 PM - Filipe Dias

The same happens on my PC. Im using Windows 7 64, with the latest master (January 14th). A second "Vector" menu appears, that contains GPS and in my case also "Statist".

#4 - 2012-01-24 07:53 AM - Filipe Dias

Turns out it was a local problem. I deleted ".qgis" folder, reinstalled the above mentioned plugins and the second "Vector" menu was eliminated.
