QGIS Application - Bug report #4741
r.in.gdal.qgis.loc problem

2012-01-04 06:55 AM - Paolo Cavallini

Status:	Closed		
Priority:	Low		
Assignee:			
Category:	GRASS		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	wontfix
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	14613

Description

The (quite handy) command has a problem:

- the location is created
- the raster is imported in it
- but the current location is not switched, therefore one gets an error (below).

History

#1 - 2012-09-04 12:10 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2014-06-28 07:41 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

#3 - 2016-02-22 11:44 AM - Radim Blazek

- Resolution set to wontfix

I don't think that r.in.gdal.qgis.loc should automatically switch current location.

What error it gives?
