Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Easy fix?:	No		**Copied to github as #:**	14677

Description

Actually to label a layer with multiple items you have to make a layer for each labels you want to display, it is missing a way in the labeling feature to be a able to label multiple items on a single layer without having to make several ones.
It is more convenient and the Properties Label feature is not working totaly the same way with the same settings.
