Pull Request or Patch supplied:	No		**Resolution:**	invalid
Easy fix?:	No		**Copied to github as #:**	14679

Description

In the simple marker symbol layer, it is only possible to change the size of markers proportionately. It is missing a way to set X and Y size of the markers. For example I have a square, but how to get a rectangle, and how to set its height and width? Same with the circle, only a circle, no way to get an elipse, same for others.

History

#1 - 2012-01-19 03:01 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

try the "ellipse marker" symbol layer type

Hi

What do you mean?

I only have these settings actually.
