QGIS Application - Bug report #4856
Copying rows doesn't copy joined values

2012-01-23 06:45 AM - Pierre-Luc Auclair

Crashes QGIS or corrupts data:		**Copied to github as #:**	14689

Description

I created a feature layer that has some associated content. I then added a CSV database to the project and made a Join on the feature layer. When I select rows and try to copy them, only the values from the feature layer gets copied, not the joined data.

I am trying to send these values to a spreadsheet in Excel for some sorting and analysis. The headers show up but the data doesn't.

Using 1.7.3.
