

QGIS Application - Bug report #487

Zero width/height when adding WMS layer to projected project

2006-12-27 02:50 AM - maris-gis-gmail-com -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Web Services clients/WMS	
Affected QGIS version:		Regression?: No
Operating System:	Gentoo	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10546
Description		
<p>Start QGIS and add some projected vector layer;[[br]]</p> <p>Enable on the fly projection; [[br]]</p> <p>Add layer from NASA (JPL) WMS server with CRS = WGS84; [[br]]</p> <p>Resulting error message below:</p> <p>Could not draw NASA (JPL) because: (Unknown error code from a post-1.3 WMS server)</p> <p>The WMS vendor also reported: Output Width and Height must both be positive</p> <p>This is probably due to a bug in the QGIS program. Please report this error.</p> <p>Tried URL: http://wms.jpl.nasa.gov/wms.cgi?SERVICE=WMS&VERSION=1.1.0&REQUEST=GetMap&BBOX=20.475803,55.118563,28.796298,58.543298,58.543158&SRS=EPSG:4326&WIDTH=0&HEIGHT=0&LAYERS=daily_aqua&STYLES=&FORMAT=image/jpeg&TRANSPARENT=TRUE</p>

This can be reproduced without an additional layer. Just open QGIS, add WMS layer, then enable projections and choose a different projection. There seems to be a problem in calculating necessary width/height, however I'm not familiar with the calculations.

#2 - 2006-12-29 12:33 PM - Gary Sherman

Moved to 0.8.1

#3 - 2007-01-01 11:16 PM - Gavin Macaulay -

- Resolution set to fixed
- Status changed from Open to Closed

This seems to be fixed now (works for me), possibly as a result of fixing ticket #474. If not, please reopen.

#4 - 2007-02-25 06:41 PM - Tim Sutton

Changed version to 0.8.0 since version 0.8.1 is not released yet...

#5 - 2009-08-22 12:51 AM - Anonymous

Milestone Version 0.8.1 deleted
