QGIS Application - Bug report #4906
WMS crashes QGIS

2012-01-28 01:49 PM - andre mano

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Web Services clients/WMS			
Affected QGIS version:	1.7.3		**Regression?:**	No
Operating System:	Windows 7		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	invalid
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	14714

Description

When trying to access properties dialog from a WMS layer, Qgis crashes.
I tested the problem with two different WMS services:

- http://www.igeoe.pt/igeoearcweb/wmsconnector/com.esri.wms.Esrimap/500k_Continente
- http://mapas.igeo.pt/wms/produtos?VERSION=1.1.1&LAYERS=Ortos

Sorry in advance if this is a duplicate

- Resolution set to invalid

- Status changed from Open to Closed

Hi Andre, this is known issue, already fixed in qgis-master and already backported in the 1.7.x branch, so the next QGIS release will be bug free.
