

QGIS Application - Bug report #4929

v.distance needs to be fixed

2012-02-01 03:13 AM - Giovanni Manghi

Status:	Closed	
Priority:	Normal	
Assignee:	Paolo Cavallini	
Category:	GRASS	
Affected QGIS version:	master	Regression?: No
Operating System:	unspecified	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 14730
Description		
When using the v.distance module the user is provided with a "(optional) column to read labels" parameter. It turns that this parameter ("to_column") must be a varchar() column of the "to=" map, but if such column does not exist (or it is not selected) then the module fails <pre>C:\>v.distance from=pontos@etrs89 from_layer=1 to=ferro@etrs89 to_type=line to_layer=1 upload=dist to_column= column=dis dmax=-1 dmin=-1</pre> GRASS_INFO_ERROR(3352,1): Column <> not found in table <ferro> GRASS_INFO_END(3352,1) so in the QGIS interface/console it is not optional at all. In the native GRASS GUI the module work as expected when no "to_column" is chosen <pre>v.distance from=pontos@etrs89 to=ferro@etrs89 to_type=line,area upload=dist column=dis</pre> and still works when it is optionally chosen <pre>@v.distance from=pontos@etrs89 to=ferro@etrs89 to_type=line,area upload=dist column=dis to_column=ciao</pre>
