

QGIS Application - Feature request #4933

Add a "fill hole" (and "fill space") tool in the core digitizing toolbar

2012-02-01 06:52 AM - Giovanni Manghi

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 14734
Priority:	Normal	
Assignee:		
Category:	Digitising	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
This request is a follow up of ticket #4880, see it for a complete description of the problem and the following request for such task.		

History

#1 - 2012-10-06 02:16 AM - Pirmin Kalberer

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#2 - 2013-08-26 05:44 AM - Bernhard Ströbl

Hi Giovanni,

I just finished work on the *fill ring* tool in DigitizingTools plugin. Please update to version 0.2.1

You can either select a ring similar to the *Delete ring* tool in the advanced-digitizing tool bar and have that filled or have all rings in all selected polygons filled (with one set of attributes).

very nice Bernhard, thanks a lot!

are you planning also a "fill spaces" tool?

#4 - 2014-06-12 05:00 PM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Open to Closed

The fill ring is now a core tool, the fill gap is available in the "digitizing tools" plugin, close enough.
