<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> upstream
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 14761

Description

The QuntumGIS creates DXF files with wrong extent values, e.g.,:

\$EXTMIN  
10  
30.0  
20  
49.75  
30  
0.0  
9  
\$EXTMAX  
10  
130.5  
20  
163.1318914119703  
30  
0.0  
9

In fact, for given example, the numbers should be as follows:

\$EXTMIN  
10  
290240.0  
20  
159640.0  
30  
0.0  
9  
\$EXTMAX  
10  
785180.0  
20  
452180.0  
30  
0.0  
9

There is problem to import such an ill-formatted file in drawing programs, as OOo.Draw, Incscap or CorelDRAW.

Tested on QGIS 1.7.1, 1.7.3 and 1.9.90

History

#1 - 2012-04-16 05:02 AM - Giovanni Manghi

- Resolution set to upstream
- Status changed from Open to Closed

QGIS uses OGR to write DXf files, if something wrong happens, then is OGR problem.
