| Pull Request or Patch supplied: | No | Resolution: duplicate |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 14823 |
| Description | | |
| <p>Layers based on OSM plugin seem to be set to old symbology by default. Pressing the "new symbology" button switches to "labeling" tab but does not activate new symbology. The only workaround I found was to load a new symbology QML. That made it switch and I could use the new features.</p> | | |

- Resolution set to duplicate
- Status changed from Open to Closed

Hi Anita, the problem is general, not only of OSM vectors, see #5000
