

QGIS Application - Feature request #5056

Allow labeling based on query

Pull Request or Patch supplied:	No	Resolution: duplicate
Easy fix?:	No	Copied to github as #: 14826
Description I would like labeling to allow me to specify a query to determine which items get a label. For example, I am displaying a map of places from TIGER. I would like to display everything--cities, villages, towns, and census-designated places (CDPs)--but I would like to only label CDPs. The only way I can see to do this now is to create two layers from the same datasource and only label one layer.
