What is the layer source projection?  
What is the projects projection?  
Is projection turned on?  
Please attach your test layer, if possible.  
I get similar errors when I reread a saved project, but when opening project settings dialog and setting projection agains, it seems OK. Can you test this?

Worksforme in trunk on win32 commit:51087d3a (SVN r6447) / commit:b6b92c9b (SVN r6451). If any more info is available, I'm glad to re-open (see above).
