

QGIS Application - Feature request #5215

Save text annotations as shapefile

2012-03-21 08:26 AM - Giovanni Manghi

Status:	Open	Resolution: Copied to github as #: 14951
Priority:	Normal	
Assignee:		
Category:	Map Canvas	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
It would be very useful to allow save text annotation as shapefile (point layer) where the text of the annotations is placed inside the shape table of attributes.

Yes this is really interesting.

Some the shapefile has max 255 chars and don't allow carriage returns.

I guess a simple but good solution could be to remove all the CarriageReturn and clip the string to 255 chars max.

Again I geuss the shapefile could have also the coordinates X Y saved in two field "X" , "Y".
