Description <p>It would be a great addition to add blending modes for colors/layers. Blending modes such as multiply, color dodge, etc. Looking at the QPainter documentation, I see it's possible to do it. I often take maps to Illustrator or other software after only to change blending modes on different objects.</p> <p>http://qt-project.org/doc/qt-4.8/qpainter.html#CompositionMode-enum</p>
