QGIS Application - Bug report #5284
MS SQL features disappear if SQL errors on insert

2012-04-02 09:59 PM - Nathan Woodrow

Status:	Closed		
Priority:	High		
Assignee:	Tamas Szekeres		
Category:	Data Provider		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	15004

Description

If you are saving a feature and the database fails to insert due to a SQL error the feature will disappear with no error to tell the user what has happened.

The PostGIS provider throws a error and blocks the save operation until the user has fixed the mistake, letting the user try to save again after the changes have been made.
