

QGIS Application - Feature request #5377

Add tags to Processing modules

2012-04-16 08:40 AM - Paolo Cavallini

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 15059
Priority:	Low	
Assignee:	Victor Olaya	
Category:	Processing/GUI	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Different backends call the same analysis in different ways, so it may be difficult for an user to find the right module. It would be good to implement a tagging system, so filtering can be done not only on the name, but also on the tags associated to each module
