

QGIS Application - Feature request #5396

Run algorithms in a different thread

2012-04-17 09:11 AM - Julien Malik

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 15067
Priority:	High	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description Currently the module execution freezes the main GUI. Execution of the modules should not be done on the main thread.

I'll have a look at this during the next days, if nobody else is working on it.

#2 - 2012-04-22 10:46 PM - Victor Olaya

Perfect!

There is a class named AlgorithmExecutor. That's where it should go. If you have questions, just ask me, ok?

#3 - 2012-05-04 11:21 AM - Camilo Polymeris

Was implementing this in the GUI code, but am not longer sure that is the right approach. Perhaps it should be lower level, so the functionality can be used in other parts of the code?

#4 - 2012-05-04 01:37 PM - Victor Olaya

IT should go on the AlgorithmExecutor Class. All other classes call it when executing an algorithm. It is on the gui package because it is used by gui elements, but we can move it later to another one. It is not itself a GUI class.

- Assignee changed from Victor Olaya to Camilo Polymeris

#6 - 2012-06-04 02:59 PM - Camilo Polymeris

- File *mt3.diff* added

This weeks diff. Includes mostly GUI improvements (percentage, feedback and a close button) and some attempts at making the iteration code work. I'll update the blog at sextante-gsoc.blogspot.com with more details, but here some technical considerations:

- Am getting crashes with the (working thread) iteration code, apparently accesses to QPixmap, but haven't been able to find the source of the problem.
- Using "new-style" PyQt slots and signals. Is that ok?

Note that the cancel button only disconnects the finished signal, since the backends don't support cancelling. One could just terminate them, but that might be problematic (file access and such).

#7 - 2012-06-04 06:29 PM - Camilo Polymeris

- *File mt4.diff added*

Iteration should work with the attached patch.

#8 - 2014-10-04 12:08 PM - Giovanni Manghi

- *Project changed from 78 to QGIS Application*
- *Category deleted (63)*

#9 - 2014-10-04 12:09 PM - Giovanni Manghi

- *Category set to Processing/Core*

#10 - 2014-10-04 12:10 PM - Giovanni Manghi

- *Assignee changed from Camilo Polymeris to Victor Olaya*

#11 - 2014-10-05 01:40 AM - Paolo Cavallini

Possibly duplicated in #11324

#12 - 2015-06-07 02:33 AM - Giovanni Manghi

- *Status changed from Open to In Progress*
- *Priority changed from Normal to High*
- *Target version set to Future Release - High Priority*

work undergoing as google summer of code
