QGIS Application - Bug report #5402
MS SQL Server native driver not detecting primary key of tables

2012-04-18 01:01 AM - Carlos da Ponte

Status:	Closed			
Priority:	Normal			
Assignee:	Tamas Szekeres			
Category:	Data Provider/MSSQL			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15070	

Description

Tables are all listed and all other attributes of the tables are detected by the driver with the exception of the Primary Key. A GID auto-incremented field is present on all tables to act as a primary key for QGIS. Please provide details on proper table structure and I will verify everything is correct on our end.

thanks!

- Status changed from Open to Feedback

There have been some changes related to the pk detection in the mssql driver. Would you check whether it fixes this problem or not?
