QGIS Application - Feature request #5449
Define files in the modeler

2012-04-22 03:29 AM - Magnus Nilsson

Status:	Closed			
Priority:	Normal			
Assignee:	Victor Olaya			
Category:	Processing/Modeller			
Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Easy fix?:	No		**Copied to github as #:**	15087

Description

It would like to be able to define the files to be processed directly in the modeler. At current, they have to be defined when starting the model, which seems work intensive when developing a model.

- Status changed from Open to Closed

This is possible - instead of linking the parameter to a model input, you can directly enter the path to a file in the text box (or click the ... and choose it from the file system). This will hardcode that path into the model, so that it's always used when executing the algorithm.
