

QGIS Application - Bug report #5585  
cannot snap after having finished editing (and started again)

2012-05-13 02:26 PM - Giovanni Manghi

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Digitising	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15162
<b>Description</b>		
<p>I'm not a guy that does a lot of digitizing, so I would be happy if someone can demonstrate that I'm the one doing the wrong thing.</p> <p>Say you have a polygon, and the you start digitize a line, and that the last node of the line has to snap a polygon segment or node. But snapping is not configured so you just end editing the line, configure snapping, re-toggle editing, pick the last node of the line (with the node tool) and try to move it and make it snap to the polygon --&gt; won't work.</p> <p>Tested on master.</p>		

History

#1 - 2012-09-04 12:09 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2012-12-11 07:14 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

seems to work now
