Status:	Closed	
Priority:	High	
Assignee:		
Category:	GUI	
Affected QGIS version:	1.7.4	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 15214
Description		
<p>Hi,</p> <p>I've installed QGIS 1.7.4 via Ubuntugis-unstable, on a fresh Ubuntu 12.04 and I've noticed the following:</p> <p>http://ubuntuone.com/3PXriik6g4Fn3r8ix58dMn</p> <p>Initially I've thought it could be a graphic card driver issue, so I've teste both on ATI and Nvidia graphics in Ubuntu 12.04 machines and the result was the same. I've tested with QGIS 1.8 and again the same.</p> <p>So I wonder if this is a QGIS issue or a Ubuntu/graphics driver issue...</p> <p>Does anyone report the same?</p> <p>Cheers,</p> <p>Pedro</p>
