

QGIS Application - Bug report #5677

Translated strings show up untranslated in the app

2012-05-30 02:13 PM - Jean-Roc Morreale

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Translations and international	
Affected QGIS version:	master	Regression?: No
Operating System:	fedora	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 15220
Description QGIS 1.8 is showing untranslated strings in the UI even if it is correctly translated in the qgis_*.ts file example from a translation in the *.ts : <pre><message> <location filename="../../src/ui/qgisapp.ui" line="1494"/> <source>Style Manager...</source> <translation>Gestionnaire de style...</translation> </message></pre>

no reproducable here - are you sure you are trying an up-to-date build?

#2 - 2012-05-31 12:40 AM - Jean-Roc Morreale

I did a git fetch/pull upstream master, status was clean. I'll try again tonight and compare with osgeo4w.

#3 - 2012-05-31 01:28 PM - Jean-Roc Morreale

- Resolution set to invalid

As Richard suggested on the tr's ml, I released a *.qm file with Qt linguist and copied it into /usr/share/qgis/i18n/ instead of the one created during the compilation.

The compilation was based on an up-to-date master branch so in theory both *.qm should be the same but the one compiled produce a 95% completion rate in the 'about' tab while the other on osgeo4w gives a 99.7%

I'm closing this bug as invalid as it seems to be limited to my build chain

#4 - 2012-06-01 02:50 PM - Jürgen Fischer

- Status changed from Open to Closed
