Description

When selecting the "Text annotation" map tool, the button of any other map tool isn't depressed. But the "Text annotation" button itself gets depressed when re-selecting any other map tool (even the still pressed one).

This is with current 1.8 release candidate (f867cc6d75a93f9a8444e5e789e42407cc63cb05)

Hello, bug triage...

I think this is fixed (at least in QGIS 2.13 master): whenever I press on the text annotation, all other tools are automatically depressed (even in edit mode).

Can you confirm ?
