

QGIS Application - Bug report #58
CPU load 100% on redraw with global render layers toggle turned off

2006-04-05 01:24 AM - Gavin Macaulay -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Map Canvas	
Affected QGIS version:		Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10117
Description		
To reproduce the bug:		
<ul style="list-style-type: none">- Start Qgis- Load a layer (I've only tried shapefiles)- Turn off the global render layer toggle- Click on the redraw icon- Qgis appears to hang		
CPU load will go to 100%, with (on Linux) X using about 94% and qgis the rest.		
Toggling on the global render control fixes the problem.		

History

#1 - 2006-04-05 01:44 AM - Martin Dobias

Fixed in commit:a38ce51a (SVN r5173).

#2 - 2006-04-05 01:46 AM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

#3 - 2009-08-22 12:46 AM - Anonymous
