Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15302

Description

There is no longer an option to invert the color ramp in the raster style properties dialog after the raster branch merger earlier this week. This is an important feature that will hopefully return.

It is back. But note that not all renderers consider this flag. Currently, multiband color and singleband gray do. Maybe it would also be usefull for singleband pseudocolor?
