QGIS Application - Bug report #5832
QGIS seg fault when loading a project with a missing CSV datasource

2012-06-20 05:21 AM - Giovanni Manghi

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Project Loading/Saving			
Affected QGIS version:	1.8.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	15307

Description

I tested (on 1.8) also other missing datasources and no crash, but it shows the following messages

ERROR 4:
`/media/436dc38a-c791-4a29-92e8-1506d42f2a9d/gio/UBC_filipe/dem_move_clipped.tif' does not exist in the file system,
and is not recognised as a supported dataset name.

or

ERROR 10: Pointer 'hDS' is NULL in 'OGR_DS_Destroy'.

I'm pretty sure that this is a regression and so the ticket should be tagged as "blocker", but I cannot test 1.7.4 right now, so if someone can give it a try I would appreciate.
