

QGIS Application - Bug report #5844

When adding a gpx the dialog shows "Nb of features" all set to "-1"

2012-06-21 11:14 AM - Giovanni Manghi

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Provider	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: wontfix
Crashes QGIS or corrupts data: No	Copied to github as #: 15314
Description	
It used to show the right number of features, I'm almost sure it is a regression (I'm testing on master). I will give a try to 1.8 and 1.7.4

History

#1 - 2012-06-21 12:02 PM - Alexander Bruy

This caused by fix for #5322 (ODBC and GPX both uses OGR provider)

#2 - 2012-06-23 01:55 AM - Alexander Bruy

Starting from commit:b6ad69d12c the "unknown" showed instead of "-1". I know this is not real fix, but at least this less confusing

#3 - 2012-12-30 09:21 AM - Giovanni Manghi

- Priority changed from High to Severe/Regression

tagging as blocker as it is a regression.

#4 - 2013-01-03 04:43 PM - Jürgen Fischer

- Priority changed from Severe/Regression to Normal

I don't agree it's a regression. IMHO it's an improvement and not a bug (see #5322). The output isn't required and therefore should be a blocker.

From a user point of view is certainly a regression, because something that says "-1" is not as informative as something (as before) that says (ex.) "35".

But if you say that is not a regression, that as I said is not true, then we should a) close this ticket or b) at least remove that column that says 'feature count "-1"'.
"-1".

#6 - 2013-01-04 01:03 AM - Jürgen Fischer

- Status changed from Open to Closed

- Resolution set to fixed

count "-1".

Alex already made it say "Unknown" instead of "-1".

Alex already made it say "Unknown" instead of "-1".

it doesn't change the meaning of what I said, from a user point of view is a regression.
