

QGIS Application - Bug report #5905

Table of attributes become empty when toggling editing (with a postgis layer)

2012-06-29 09:49 AM - Giovanni Manghi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 15353
Description		
Open the attached project (alert: the postgis vector in the project is quite big).		
Open the table of attributes and then toggle editing. The table become empty, but searches seems to work.		
If editing is toggled before opening the table it seems to work fine.		
Does not happens if the same vector is saved as shapefile.		
Tested on both 1.8 and master.
