

QGIS Application - Bug report #5968

Georeferencing plugin imports transparent area when set transparent = 0 active

2012-07-06 02:18 PM - Matthew Rose

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Georeferencer	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: end of life
Crashes QGIS or corrupts data:		Copied to github as #: 15387
Description		
When importing a png via the georeferencing plugin, on some PNGs the transparent area will be imported, not the colored area. Suspect it's to do with png palette -- that's the only difference I can see between the two images other than the slightly different shapes.		

History

#1 - 2012-09-04 12:07 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2014-06-21 02:06 PM - Jürgen Fischer

- Category set to C++ Plugins

#3 - 2014-06-28 07:42 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

#4 - 2014-06-29 06:33 AM - Jürgen Fischer

- Category changed from C++ Plugins to C++ plugins/Georeferencer

#5 - 2017-05-01 01:09 AM - Giovanni Manghi

- Regression? set to No

- Easy fix? set to No

#6 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
