

QGIS Application - Bug report #601

Georeferencer plugin incorrectly handles PNG files

2007-02-16 02:36 PM - egor-altlinux-ru -

Status:	Closed	
Priority:	Low	
Assignee:	Magnus Homann	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10660
Description		
I tried 0.8 on Ubuntu and Windows XP with the same result: when the georeferencer plugin is used with a PNG file, the scale and placement are distorted. After I converted the file to TIFF, everything worked well.

Did you use the linear or helmert transform. Only linear should work for PNG.

#2 - 2007-03-03 01:19 PM - egor-altlinux-ru -

Hello!

Yes, I tried it once again with linear transform, and it worked. Maybe some hint should be given to warn those who are trying to run the plugin with helmert?

Yes, there is a warning actually in latest 0.8.1 preview. You can download and try:

http://www.qgis.org/uploadfiles/testbuilds/qgis_setup0.8.1preview2.exe

on XP if you like. Please un-install any old Qgis first!

Closing this bug.
