

QGIS Application - Bug report #6102

Clicking save when actively editing attribute doesn't save changes.

2012-07-26 01:59 PM - Nathaniel Kale

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: end of life
Crashes QGIS or corrupts data:		Copied to github as #: 15447
Description		
<p>To reproduce - open a shapefile (not tested on other feature class types). Open the attribute table and start an editing session. Double-click to start editing a field, delete existing characters or add new characters, then click the save button without pressing enter or clicking outside of the field you are editing. The changes you made are discarded. Exiting the field in any way allows the changes to be saved.</p>

Is this a regression since 1.7.4 ?

#2 - 2012-07-26 04:20 PM - Nathaniel Kale

Tough to say if it's a regression. My 1.7.4 on my Windows XP computer at home doesn't have a save button on the attribute window. However, if you duplicate the steps up to adding or deleting characters, then end the editing session by clicking on the toggle edit button, the same issue occurs - there is no pop-up to ask if you would like to save your edits, and the changes are lost.

#3 - 2012-07-27 12:32 AM - Giovanni Manghi

- Operating System deleted (Windows)
- Target version changed from Version 1.8.0 to Version 2.0.0
- Priority changed from Normal to High
- Category set to Vectors
- OS version deleted (7)

Then is not a regression and so it is not a blocker but still a pretty nasty bug (IMHO).
