QGIS Application - Bug report #6142
problem with 'WITH' query in DB Manager to create new layer from query (using PostGIS DB)

Description

When using DB Manager, and the SQL Windows,

When using a 'WITH' in a SQL query the result rows are properly shown and everything is fine.

But when trying to use this result to create a new layer it silently doesn't work.

I tried an equivalent SQL query without 'WITH' and it worked. I of course tried the 'WITH' query in PgAdmin it works well.

Associated revisions

Revision 5988a9c9 - 2012-08-02 06:14 PM - Jürgen Fischer

fix #6142

History

#1 - 2012-08-02 08:56 AM - Giuseppe Sucameli

- OS version deleted (32 Vista)

- Operating System deleted (Windows)

- Target version deleted (Version 1.8.0)

- Category changed from DB Manager to Data Provider

That behavior depends on the provider, there's a check that allows SELECT queries only.

Removing that check was discussed few weeks ago on the developer ML, see

http://osgeo-org.1560.n6.nabble.com/Postgres-provider-checks-queries-and-refuses-CTE-td4987347.html

#2 - 2012-08-02 09:15 AM - Jürgen Fischer

- Status changed from Open to Closed

Fixed in changeset commit:"5988a9c9dc5898ea2fe7463e65e854189e07b16f".
