

QGIS Application - Bug report #6143

Field Calculator - No update existing field option available for PostGIS layer

2012-08-02 03:23 AM - Tom Joseph

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows, Linux (Ubuntu)	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 15471
Description		
<p>There is no update existing field option available for a postgis vector layer when not logged on as the table owner.</p> <p>After a quick scan of qgsfieldcalculator.cpp (line 46-51) I see that if the data provider does not support field addition it disallows existing field edits with mUpdateExistingGroupBox->setCheckable(false);. Should that not read mNewFieldGroupBox->setCheckable(false); ?</p> <p>Expected result - Limit some users to only update data and not the ability to create new fields. Editing data for these users works as expected using the attribute form on an individual features but not multiple row updates in the Field Calculator.</p>
