

## QGIS Application - Bug report #6175

### Open file with QGIS when not running closes new project

2012-08-12 12:36 PM - William Kyngesburye

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>	Project Loading/Saving	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	OS X	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15492
<b>Description</b>		
<p>if QGIS is not running, and you double-click/drag-n-drop/open-with a file (ie a shapefile), this normally starts up QGIS and adds the file to the new project that is always created on startup. Now, the file is added to a new project, then the project is closed to create another new project. This triggers the save/cancel dialog - if you Don't Save or Save, the project is closed and a new empty project created, if you Cancel, the original project with the opened file remains.</p> <p>Kinda sounds like the order of startup operations changed, so the usual new empty project is created after the opened files are processed?</p> <p>Works correctly in 1.8.</p>		

#### History

**#1 - 2012-08-12 02:05 PM - Giovanni Manghi**

If it is a regression please tag this as blocker.

**#2 - 2012-08-12 02:15 PM - William Kyngesburye**

- Priority changed from Normal to Severe/Regression

**#3 - 2013-04-08 08:32 PM - William Kyngesburye**

- Resolution set to duplicate

This is the original bug I was thinking of for a more recent bug report, #7532. Fixed there, so this is now duplicate.
