

## QGIS Application - Bug report #6185

### Can't write pyramids to separate .ovr file if raster file is read-only

2012-08-12 09:46 PM - Alister Hood

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>		
<b>Category:</b>	Rasters	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15499
<b>Description</b>  Make a jpeg file read-only. Load the jpeg into QGIS. Right-click the jpeg layer in the TOC Choose Properties>Pyramids Select a pyramid resolution and click the "build pyramids" button.  You will get an error message: "Write access denied>Adjust the file permissions and try again". But the file permissions on the jpeg file should not matter, because the pyramids would be saved in a separate .ovr file! I believe the same should apply regardless of the image format, as long as the option "Build pyramids internally if possible" is not selected.		

#### History

##### #1 - 2012-09-04 12:07 PM - Paolo Cavallini

- Target version set to Version 2.0.0

##### #2 - 2014-06-28 07:42 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

##### #3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

##### #4 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

#### End of life notice: QGIS 2.18 LTR
