Description			
<p>Two bugs with this web-tracker:</p> <p>(a) If I change "tracker" from "Bug" to "Feature", most of the bug stuff disappears. But if I change it back to "Bug" it doesn't come back.</p> <p>(b) If I submit a "Feature" and click "create and continue", the new Feature has all of the details for "Bug" despite saying "Feature".</p> <p>Using Opera 12.00</p> <p>(also does it with this one which has "support" instead of "bug". But on this one the "feature" seems to be treated the same way as "bug" on the other one.</p>

Hello, bug triage...

I think this is fixed (if I change from tracker to bug and vice-versa, all the fields of each category are shown), could you confirm (and close it) ?
