

QGIS Application - Bug report #621
on last windows version georeferencer returns error(14) :unable to open database SRS.db

2007-02-28 08:10 AM - pascal-ferrand-tiscali-fr -

Status:	Closed	
Priority:	Low	
Assignee:	Magnus Homann	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10680
Description		
When I want to use georeferencer on windows qgis-0.8.1-preview1.exe it's replied "error(14): unable to open database SRS.db" after that the good window is opened the map draws but zoom and others "buttons" don't appear

Probably an issue with PKGDATA_PATH. I will investigate.

#2 - 2007-02-28 12:27 PM - Magnus Homann

- Resolution set to fixed

- Status changed from In Progress to Closed

No, clash with old/new plugins. The plugins have been renamed, and the old files were still around and got picked up by Qgis. That's why there are two of each plugin when you view the plugin manager.

A workaround is to go to C:\Program Files\Quantum GIS\lib\qgis and remove all files older than 23rd of February. We will update the package.
