Pull Request or Patch supplied:	No	Resolution: invalid
Easy fix?:	No	Copied to github as #: 15573
Description		
Hello, It seems that, whatever is the SRC in qgis projets, the request made by qgis-web-client is always in EPSG:4326 ref, and with incorrect BBOX values. I see in my server logs : http://127.0.0.1/cgi-bin/qgis_mapse...e_inimage&#38;SRS=EPSG%3A4326&#38;BBOX=245953.31073421,5851499.8722899,246173.68926579,5851660.1277101&WIDTH=1008&HEIGHT=733 but it should be (in EPSG:3857) : http://127.0.0.1/cgi-bin/qgis_mapse...e_inimage&#38;SRS=EPSG%3A3857&#38;BBOX=-706101.94927708,5081160.22902979,114639.95881506,6671372.72362724&WIDTH=1008&HEIGHT=733 or in EPSG:4326 : http://127.0.0.1/cgi-bin/qgis_mapse...e_inimage&#38;SRS=EPSG%3A4326&#38;BBOX=-5.13902,40.881876463294,9.55983,51.57023536706&#38;WIDTH=1008&#38;HEIGHT=733

- Category set to QGIS Server
- Target version set to Version 2.0.0

Not sure if is related, but have you set the "CRS restrictions" in the project properties?

#2 - 2012-08-29 08:12 AM - Eric MOI

Yes, i've set the "CRS restrictions" in the project properties ;-)

#3 - 2012-08-29 08:17 AM - Eric MOI

I've moved this issue to :
#6277

Could you close this one ?

Sorry...
