Description

When you display a combo box for a relation value (foreign key) in the attribute editor and choose to show the items ordered, a NULL-value is not selected, when the data has a NULL-value.

The attached patch solves this problem. Apart from that, the NULL-value is now always the first item in the combobox.

Hi Jürgen,

Can you please have a look at this patch? I think you know this bit of code the best.

Thanks,
Andreas
