

## QGIS Application - Feature request #6285

### Set Offsets for Point Labels

2012-08-30 10:24 PM - Astrodog Astrodog

<b>Status:</b>	Closed	<b>Resolution:</b> <b>Copied to github as #:</b> 15585
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Labelling	
<b>Pull Request or Patch supplied:</b>		
<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>I'd like to be able to set the position for the label that applies to a point, (e.g., centered under the point), in a similar manner to how it works under the old labeling system. Alternately, a way to set X/Y offsets for point labels would also solve my problem.</p>		

#### Associated revisions

##### Revision 61a50225 - 2012-09-03 06:13 AM - Larry Shaffer

Add quadrant, offset, rotation for points/centroids in adv labeling

- Possible fix for #4634, #5256, #6162
- Uses GEOS to convert centroids to points before PAL solution
- Implements #3492, #6285
- Convert PAL layer types 'over point/centroid' to 'offset from point/centroid'
- Add quadrant offsets (above/below/right, etc. like in old labeling)
- Add x and y offset, in mm or map unit, in addition to quadrant
- Default for offset is set to map units (mm scales oddly with zoom)
- Implements #4517, #6118; updates fix for #4317
- Rotation is independent of data defined columns
- Rotation bounding box included in offset calculation
- GUI spin box range set from -360 to +360 for initial dev testing
- Keep from scaling letter/word spacing if set to 0

#### History

##### #1 - 2012-08-31 02:01 AM - Giovanni Manghi

- Status changed from Open to Closed
- Resolution set to duplicate

Seems duplicate of #3492

Please reopen if necessary.

##### #2 - 2012-08-31 09:08 AM - Astrodog Astrodog

It's certainly close. While the fix for #3492 would resolve the problem I'm having right now, I'd really prefer the old system wherein I can simply check "Below".
