<b>Description</b>  Hi,  I like to have possibility to render thousand separators in numeric scalebars in map composer. Now, when I have map with scale of 1:1 million, numeric scale bar will be '1:1000000'. I'd like it to be '1:1 000 000'. Or for nerds to be '1:1M' (this is joke ;-).  This very minor new feature request. But quite important feature when you made "pro-like" maps.  Rgs,  Pekka

Commit ee1636900a3403127d1853f52ae79853082a0ca5 localises the string (with thousand separator here). Is this what you were looking for?

Marco,

At least Windows version (1.9.0 - master / revision 6a0d2f5) work as I expected. So, I presume we can close this.
