Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10695	

Description

When you try to export to [[MapFile]] with msexport utility and you have a layer classified with unique value and it has no value in the classification string field, msexport report an error.

History

#1 - 2007-03-20 01:57 PM - jmckenna-dmsolutions-ca -

Exactly what has been happening to me all of this time: I have been trying to export a layer classified by unique values, and a few of the records are blank - I had no idea why msexport was crashing!

#2 - 2007-03-20 02:08 PM - jmckenna-dmsolutions-ca -

My test environment:

Windows
QGIS 0.8.1 preview3

(I have been testing with this same shapefile right from the beginning of QGIS, i just had no idea that a single blank value was causing it!)
