

QGIS Application - Bug report #6366

Check QGIS Version

2012-09-18 08:21 AM - David Quinn

Status:	Closed	
Priority:	Low	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 15631
Description		
<p>When 'Help' -> 'Check QGIS Version' is chosen, the following message appears:</p> <p>"You are running the current version of QGIS. Visit http://download.qgis.org to get your copy of version 1.8.0</p> <p>Would you like more information?"</p> <p>However, I am running version 1.8.0 so the message should probably be:</p> <p>"You are running the most recent version of QGIS"</p>		

History

- Operating System deleted (OSX)
- Priority changed from Normal to Low
- Status changed from Open to Feedback

IMO there is no big difference between "current" and "most recent" version in this case. Moreover "most recent" can be considered as master/nightly build.

#2 - 2012-10-05 10:30 AM - David Quinn

Maybe I was not clear how I described this, but from a UI perspective it is confusing to be prompted to update when you are already using the most recent version. I think the line "Visit <http://download.qgis.org> to get your copy of version 1.8.0" should be removed.

#3 - 2014-06-21 04:07 AM - Jürgen Fischer

- Resolution set to fixed/implemented
- Status changed from Feedback to Closed
