

QGIS Application - Bug report #637

QGIS Crash when WMS getcap fails

2007-03-04 11:46 PM - spatialguru-shaw-ca -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Web Services clients/WMS	
Affected QGIS version:		Regression?: No
Operating System:	OS X	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10696
Description <ul style="list-style-type: none">- I've built qgis_unstable from source- I "add default services" for WMS- Selected server connection "DM Solutions GMAP" and press "connect"- Message pops up saying: Could not understand the response. The wms provider said: WMS Server responded unexpectedly with HTTP Status Code 502 (Proxy Error) Tried URL: http://www2.dmsolutions.ca/cgi-bin/mswms_gmap?SERVICE=WMS&#38;REQUEST=GetCapabilities- I press "close" then QGIS crashes <p>Let me know if there are more tests I can do. Same action with Lizardtech connection. JPL ones seem to work fine. Dump report from apple tool is attached. Tyler</p>

Did you specify a proxy host?

#2 - 2007-03-05 08:15 AM - spatialguru-shaw-ca -

No, I left proxy host empty as I do not use one. It is the same as the other entries that work.

#3 - 2007-03-05 11:25 AM - anonymous -

- Resolution set to fixed
- Status changed from Open to Closed

Confirmed, homann's fix <https://svn.qgis.org/trac/changeset/6768> worked for me. Thanks.
