

QGIS Application - Feature request #648

Create route from waypoints in GPX Layer

2007-03-11 06:36 AM - cbsled-verizon-net -

Status:	Closed	
Priority:	Low	
Assignee:	Magnus Homann	
Category:	Digitising	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 10707
Description		
<p>Add functions to:</p> <p>*Create Route from Waypoints</p> <p>Create Waypoints from Route*</p> <p>in a GPX layer. Then the route and waypoints will exactly match, and only one digitization pass will be required.</p> <p>An enhanced function would be to add an option to:</p> <p>Snap to Waypoints</p> <p>when digitizing a route which does not follow the waypoints in the order in which they were entered.</p>		

History

#1 - 2007-12-11 11:21 AM - Magnus Homann

- Status changed from Open to In Progress

#2 - 2007-12-13 08:10 AM - Magnus Homann

- Resolution set to fixed

- Status changed from In Progress to Closed

In commit:4ae3e208 (SVN r7778) a tab is added to the GPS plugin that simplies conversions of GPX files. Requires gpsbabel installed.
