Description		
The Open Geospatial Consortium test suite for GML 2.1.2 does not consider the GML provided by QGIS WFS Server is not valide. http://cite.opengeospatial.org/test_engine/gml/2.1.2/validator/ The first problem is that schemaLocation doesn't reference the QGIS GML namespace : http://www.qgis.org/gml The second problem is cvc-complex-type.2.4.a and the solution is here http://stackoverflow.com/questions/7483331/xml-schema-validation-cvc-complex-type-2-4-a
