QGIS 1.8 works? gdal\_translate works?

##### #3 - 2012-10-17 05:51 AM - Thomas Arnold

QGIS 1.8 standalone installer works fine (GDAL/OGR 1.9.1).

gdal\_translate and gdalinfo in Master and QGIS 1.8 OSGeo-Installation (GDAL/OGR 1.9.2) crashes too. It seems to me that this is a problem of the MrSID Raster plugin in the latest gdal version.
